Press release
Paris, 2 July 2026

PARIS BUILDERS SHOW

THE 38 INNOVATION AWARD WINNERS HAVE BEEN ANNOUNCED

The juries of the Innovation Awards have made their decisions: 38 winners have been selected from among the 110 products and solutions nominated, which had been selected from 278 submissions received. The winners were announced on 2 July at the Cité du Cinéma during a preview event for the press demonstrate the high impact and quality of the innovations showcased by exhibitors at the Paris Builders Show.

As the only event to offer such a diversity of categories and innovations, the Paris Builders Show once again attracted significant participation from those in the building, construction and renovation sectors. With 278 submissions, 110 nominees and 38 winners, this edition confirms manufacturers' growing interest in the Innovation Awards.

The juries had to choose between a large number of particularly high-quality submissions. The quantity of submissions, maturity of the solutions presented and comparable level of several innovations made making choices difficult. This requirement led the juries to award jury's choice awards in certain categories, as well as joint awards.

This edition has 10 categories, including one new one, Sun Protection.

- Construction Tech®, Start-up, IT and new technologies
- Decarbonisation
- Climate engineering
- Structural work, structure and building envelope
- Interior & Design
- Construction machinery, tools, vehicles and equipment
- Joinery and façade
- Sun protection
- Bathrooms
- Tertiary / Climate Engineering

The Innovation Awards at the Paris Builders Show

The **awards ceremony will take place on 28 September 2026** at Porte de Versailles.

From 28 September to 1 October, visitors will be able to discover these innovations thanks to interactive kiosks present in all the Pavilions. They will have access to video pitches and full descriptions to download. This digital device makes it possible to create a tailor-made tour to meet the most innovative manufacturers and players.

INNOVATION AWARDS
BATIMAT
IDÉOBAIN
INTERCLIMA
RENODAYS

LIST OF WINNERS

CONSTRUCTION TECH®, START-UPS, IT AND NEW TECHNOLOGIES

GOLD AWARD WINNER	**ARGILE**	Argile
SILVER AWARD WINNER	**KLOUVIS**	In-kind donation (AGEC law)
BRONZE AWARD WINNER	**LOGEMENT 3D**	Visuary

In this category, 1 nominated product received the special Jury's Choice prize:

JURY'S CHOICE	**LA BONNE REPONSE**	La Bonne réponse

DECARBONISATION

GOLD AWARD WINNER	**FIBOO**	Fiboo Flex
SILVER AWARD WINNER	**SINIAT**	Vivapure® BA13 STD
BRONZE AWARD WINNER	**Assembl-IH**	Mon Alveole® Circular

CLIMATE ENGINEERING

GOLD AWARD WINNER	**CHRISTIAN CARDONNEL CONSULTANT and HWQ Concept**	enovaQ by HWQ concept
SILVER AWARD WINNER	**SAUNIER DUVAL**	ThermaPlus M-Condens
BRONZE AWARD WINNER	**ÖkoFEN**	Pellematic Smart XS 400

In this category, 1 nominated product received the special Jury's Choice prize:

JURY'S CHOICE	**ANJOS VENTILATION**	CO_2 air inlet

STRUCTURAL WORK, STRUCTURE AND BUILDING ENVELOPE

GOLD AWARD WINNER	**PREFA FRANCE**	PREFALZ solar module
SILVER AWARD WINNER	**JOUSSELIN**	HYBRIMUR
BRONZE AWARD WINNER	**PHOMI Holding**	PHOMI eSolarFacade

INTERIOR & DESIGN

GOLD AWARD WINNER	**BEAL**	Mortex® Color 3
SILVER AWARD WINNER	**SAINT-GOBAIN ECOPHON**	Laser Layout Service by Ecophon
BRONZE AWARD WINNER	**WALL-DE-FIX**	WALL-DE-FIX (WALL-DESIGN-FIXATION)

CONSTRUCTION MACHINERY, TOOLS, VEHICLES AND EQUIPMENT

GOLD AWARD WINNER	**BRAND France / SGB Hünnebeck**	CP Formwork Stripping Trolley
GOLD AWARD WINNER	**CRYSLA S.A.S**	Masticbox Sadurr® Quattro
SILVER AWARD WINNER	**MILLS**	DUO harness-free solution
BRONZE AWARD WINNER	**FIRST BASE**	TP60 pull test kit

JOINERY AND FAÇADE

GOLD AWARD WINNER	**TECHNAL**	Re-Nouveler la façade
SILVER AWARD WINNER	**K-LINE**	K-Line Low Carbon windows
BRONZE AWARD WINNER	**BEL'M**	ALVAR Aluminium model front door
BRONZE AWARD WINNER	**FUTUROL**	BLOC'LAM

BRONZE AWARD WINNER	**GEPLAST**	FoKus® 2

In this category, 1 nominated product received the special Jury's Choice prize:

JURY'S CHOICE	**MILLET PORTES ET FENETRES**	ultiM

SUN PROTECTION

GOLD AWARD WINNER	**KE FRANCE**	Quad
SILVER AWARD WINNER	**EHRET**	SolarSlide
BRONZE AWARD WINNER	**RENSON**	Topfix Large

In this category, 1 nominated product received the special Jury's Choice prize:

JURY'S CHOICE	**BANDALUX**	Z-Box XXL

BATHROOMS

GOLD AWARD WINNER	**ROTH FRANCE**	E-Vipanel
GOLD AWARD WINNER	**WEDI**	wedi Fundo Thermo®
SILVER AWARD WINNER	**LES ROBINETS PRESTO**	PRESTO Slim
BRONZE AWARD WINNER	**ALCA**	Under embargo

TERTIARY / CLIMATE ENGINEERING

GOLD AWARD WINNER	**VIEGA**	Smartloop-Inliner
SILVER AWARD WINNER	**JEREMIAS FRANCE**	Ekkotherm
BRONZE AWARD WINNER	**PANASONIC**	Jet Air Stream

Trends observed through the Innovation Awards

Services, AI and technologies: trends seen across candidates for the Paris Builders Show Innovation Awards

With 278 candidates and 110 nominated products and solutions, the Paris Builders Show Innovation Awards 2026 have highlighted several underlying trends in general, as well as trends specific to certain product groups.

An initial observation is that **renovation is the main theme of submissions in 2026**, across all product groups. This involves as much the renovation of commercial curtain walls with the RE-NOUVELER la façade offering from TECHNAL, as housing with the hybrid plant-based entrance door from Minco. A second observation is that **AI (Artificial Intelligence) is making a big impact**.

This no longer just involves well-written programs, but truly reflects the characteristic pairing of AI with a database associated with an operating program. Argile in the Construction Tech®, Start-up, IT & New Technologies category is an example. Argile uses a scan of existing housing, creates a 3D reconstruction, launches a physical simulation engine and refers to an impressive database to propose renovation solutions, assess their production of ESC application files, etc. Bravi, another competitor in the same category combines AI with a phone or tablet equipped with an internet browser: a professional asks a question, AI understands the question's meaning (e.g. Can this shutter be renovated with an 80 mm rebate?") and automatically takes into account constraints from multiple documents to build a coherent response. For its part, La Bonne Réponse has developed an AI solution specifically designed for building and energy renovation professionals. TenderStrike on the other hand is an AI platform that turns a construction company's data assets (CV, past references, prices practised, previous memories) into operational intelligence to win its tenders.

Decarbonisation embodied in different ways

Thirdly, efforts to decarbonise can be found in all product categories. Almost all products in competition have an EPD (Environmental Product Declaration) or a PEP (Product Environmental Profile) to prove their carbon content. This effort begins with **reducing the carbon footprint of products during manufacturing**, in particular through the **use of recycled or bio-based materials**.

In windows and façades, manufacturers such as Technal and K-Line use 75% or up to 100% recycled aluminium in their profiles to achieve this. Other manufacturers, such as Reynaers Aluminium France with its TimberWall 50, combine aluminium and wood in their façade processes in order to reduce their carbon footprint.

SINIAT's Vivapure® BA13 STD plasterboard on the other hand incorporates bio-based plant-based materials from sustainable sources to result in a negative carbon impact at the factory

gate. With its Plumbox Line ventilation plenum, France Air replaces traditional sheet metal with recycled polyester textile. Biofib presents Biofib Toiture, a bio-based insulation solution with a low carbon footprint. The French company Fiboo launches Fiboo Flex, an indoor thermal and acoustic insulation solution based on bamboo fibres, with negative dynamic LCA. As for Bugal, it presents a range of railings and privacy screens in aluminium and wood. This then involves **reducing energy consumption** in all areas by implementing new solutions. For example, Christian Cardonnel Consultant and HWQ Concept present enovaQ by HWQ Concept which halves heat loss in a collective hot water distribution loop. In terms of openings, sun protection has become widespread to counter summer discomfort.

Easier implementation and use

A fourth observation is **ease of use, from implementation to maintenance via use, which is a recurring theme** in all areas, from tools to sun protection and structural work. This involves compensating for a loss of skilled workers on construction sites, improving productivity or making the result more reliable.

Partner IM Robotics Technology Co., Ltd. has an electric robot for example which automatically lays tiles from 300 x 600 mm up to 600 x 1200 mm. BEAL International has developed Mortex® Color 3, a technical and decorative fine mineral microcement, based on high-performance lime and hydraulic binders, which is integrally waterproof and can be applied in a single layer of up to 3 mm to create seamless continuous surfaces, with high water and wear resistance. WALL-DE-FIX has developed a modular fixing and assembly system for the design and production of customised wall furniture, whether mounted or freestanding, in all shapes and dimensions, from just 10 technical parts, coupling cubes and connecting tubes. With AeroBarrier, Aeroseal France showcases an airtight process by aerosol injection. A slight increase in pressure is created inside the building, forcing air to flow to leak areas. A mist of non-toxic sealant is then injected: the particles naturally migrate to gaps – around windows, doors, power outlets – where they bind and seal them. The advantage is that this process is fully automated and does not require any prior fault localisation. Jousselin Préfabrication delivers its Hybrimur to the construction site in ready-to-install elements to reduce worksite time and make the result reliable.

Widespread adoption of apps and services

The fifth trend is the **increase in professional apps**. WALL-DE-Fix has developed WALL-DE-FIX SIMULATOR to support its system. It is a design aid that provides a 2D plan, the list of elements required, details of tube lengths, a 2D drawing of the drilling points, a detailed list of fixing positions and an estimate of the project cost. In terms of services, Saint-Gobain Ecophon offers a laser layout service: 2D or 3D plans are directly projected by laser onto ceilings, replacing conventional marking operations and dividing marking time by 10.

Specific trends by domain

Beyond these general developments, the Innovation Awards highlighted developments specific to certain product groups. With regard to **heat pumps, all models presented except 1 use R290 for fluid** due to its low GWP (Global Warming Power) of 3, the European F-gas regulation requiring fluids with GWP < 150 and its excellent thermodynamic performance.

Even indoor ground-source heat pumps, such as the NIBE S1257 PC, use R290. It is an explosive fluid that carries certain installation constraints, but the Flexible Space function presented by Vaillant-Saunier Duval group eliminates installation constraints for its R290 air/water heat pumps, except 35 cm deep and 10 cm high being required behind the machine.

Two brands, MIDEA HVAC FRANCE with its H-PACK and Domusa Teknik with its Nanoclima, offer air/water heat pumps for indoor installation. Only two ventilation ducts (inlet and outlet air) connect the unit to the outside, through a wall or the roof. **Photovoltaic solutions are on the rise**. PHOMI eSolarFaçade clads the entire façade with PV panels that don't look like PV panels at all. Prefa France, with its Prefalz PV module, and Roofit Solar Energy OÜ, with Velario Slim Anti-Glare modules, showcase integrated roof solutions. EHRET GmbH on the other hand offers Solar Slide solar sliding shutters.

Supersizing applied to openings and sun protection. Bandalux France offers Z-Box XXL, an external roller shade with a zip system that will cover an area of up to 37.5 m², 7.5 m wide and 5 m high. GRIESSER showcases Solozip® III, a fabric zip screen of up to 6 m x 3 or 3 m x 6, or 18 m². With Topfix Large, Renson has developed a horizontal sun shading solution of up to 6,000 x 5,000 mm, or 30 m². When it comes to openings, Millet Portes et fenêtres offers its ultiM sliding door range up to 12 m in length over 2.95 m in height with 4 tracks.

Finally, several competitors in the Innovation Awards are using **technology embedded** in everyday objects for professional application. The best example is Visuary by Logement 3D, an iOS app that has been using LiDAR embedded on the iPhone Pro and iPad Pro since 2020 to capture measurements of a home from a single scan, then produce 2D or 3D plans, surveys, etc.

Experts who participated in the Juries of the Innovation Awards 2026

(in alphabetical order)

Malika	BENAMAR	Construction Site Organisation Manager	**OPPBTP (Professional Organisation for the Prevention of Construction and Public Works)**
Stéphanie	BIGEON-BIENVENU	Associate Director	**IMPULSE PARTNERS**
Anne	BOULAY	Editor-in-Chief	**VMA**
Jean-Luc	BUCHOU	Managing Director	**PROMODUL/INEF4**
Carlos	CARLSEN	Building & Wood Construction Manager	**OPPBTP (Professional Organisation for the Prevention of Construction and Public Works)**
Steve	CARPENTIER	Section Editor	**BATIACTU**

About RX

RX is a world leader in events and exhibitions. RX draws on its sector expertise, data and technology for companies, local authorities and individuals to grow. Present in 25 countries and covering 41 business sectors, RX organises nearly 350 events per year. RX is committed to creating an inclusive work environment for all its employees. RX enables businesses to grow through data and digital solutions. RX is part of RELX, an international provider of data, decision and analysis tools for professionals and businesses. For more information, visit the website www.rxglobal.com.

RX France is the creator of high added value meeting places, which are leaders in around fifteen different markets. RX France's flagship national and international trade shows include MIPIM, MIPCOM, Batimat, Pollutec, EquipHotel, SITL, IFTM, Big Data & AI Paris, MAPIC, Paris Photo, Maison&Objet* and many others. Our events take place in France, Hong Kong, Italy and Mexico. For more information, visit www.rxglobal.fr

*Organised by SAFI, a subsidiary of RX France and Ateliers d'Art de France

About RELX

RELX is a global provider of data, decision and analysis tools for professionals and businesses. RELX is present in more than 180 countries and territories and has offices in around forty countries worldwide. RELX employs more than 37,000 people, more than 40% of whom are in North America. The shares of RELX PLC, the parent company, are listed on the London, Amsterdam and New York stock exchanges with the following MIC: London: REL; Amsterdam: REN; New York: RELX.

*Note: Current market capitalisation can be found at http://www.relx.com/investors
